

BASIC OFS/ESP WORKSHOP

OFS Workshop Objectives

- What NWSRFS is and isn't.
- What are OFS, IFP, ESP, and ESPADP and how they relate to NWSRFS.
- How OFS fulfills the functions of a River Forecasting System.
- How different types of data are stored in OFS.
- How to define and maintain the data network information used by the preprocessors.

OFS Workshop Objectives (cont.)

- How to define and maintain the parametric information needed to use the hydrologic and hydraulic models to produce forecasts.
- How to run the preprocessors and the forecast component.
- How to look at the output of a forecast run and make run-time adjustments.
- What to do when things go wrong.
